PROFILE

Senior Full Stack Engineer with 5+ years of experience designing and building production web applications using React, Next.js, Typescript, Node.js, and Ruby on Rails. Experienced in owning full-stack features from technical design through production, developing REST APIs, designing reusable frontend architectures, and working with relational and NoSQL databases. Strong background collaborating across product and engineering teams to build scalable SaaS applications.

PROFESSIONAL EXPERIENCE

Globant | Lima, Peru **June 2022 – Present**
Web UI Developer | Full -Stack Engineer

- Proposed and led the migration to a centralized state management architecture using Redux Toolkit after identifying scalability and unnecessary re-rendering issues in a complex advertising platform. Validated the approach through an MVP, secured technical approval, and collaborated on the migration, enabling a more maintainable foundation for future features.
- Designed and implemented the new Carousel Ads feature by defining the data model, extending the backend to support multiple assets per advertisement, and developing reusable React hooks to centralize asset and tracker management, enabling scalable support for interactive advertising templates across multiple platforms.
- Developed and maintained full-stack features for a microfrontend-based SaaS advertising platform using React, Next.js, Node.js, and Express, delivering new capabilities, API enhancements, production bug fixes, and performance improvements in an Agile environment.
- Collaborated with cross-functional teams throughout the software development lifecycle, participating in backlog refinement, sprint planning, technical design discussions, code reviews, pair programming, and production support to ensure high-quality feature delivery.

Ravn | Austin, TX **Aug 2021 – May 2022**
Associate Software Engineer

- Developed and maintained RESTful APIs using Ruby on Rails following Test-Driven Development (TDD) practices, implementing new business logic and expanding platform capabilities for a wine e-commerce and delivery platform.
- Designed and implemented a reporting endpoint consumed by both the web application and React Native mobile app, aggregating historical purchase data to support customer analytics while ensuring data accuracy for business reporting.
- Investigated and resolved a production issue affecting a subset of customers by performing root cause analysis on an intermittent failure triggered by a scheduled background job. Identified inconsistent database values that caused unhandled API exceptions and implemented a permanent fix to restore application stability.
- Contributed to frontend development in React Native while improving API maintainability through refactoring, automated testing with RSpec, and close collaboration within a cross-functional Agile team.

MICROVERSE | **Remote** **Sep 2020 – Feb 2021**
Mentor (Volunteer)

- Mentored 4 junior software developers through code reviews, pair programming, and technical guidance, helping them improve software engineering best practices and successfully progress through the Full Stack Web Development program.
- Provided weekly coaching sessions focused on problem-solving, project feedback, and professional growth, fostering technical confidence and effective collaboration in a fully remote environment.

EDUCATION

CIBERTEC | Lima, Peru 2026 - 2029 (Expected)
Cybersecurity Engineering - in progress

MICROVERSE | Remote **Graduated 2020**
Full Stack Web Development Program

- Completed an intensive full-time software engineering program with 1,500+ hours of hands-on training in algorithms, data structures, full-stack development, and collaborative software engineering.
- Built 30+ full-stack projects using JavaScript, React, Redux, Ruby on Rails, PostgreSQL, Git, and Agile development practices.

TECHNICAL SKILLS & ADDITIONAL

Frontend: React, Next.js, Redux Toolkit, TanStack Query, Material UI, React Native.
Languages: JavaScript (ES6+), TypeScript, Ruby, SQL, HTML5, CSS3, SCSS.
Backend: Node.js, Express.js, NestJS, Ruby on Rails, REST APIs, GraphQL.
Testing: Jest, React Testing Library, RSpec, Test-Driven Development (TDD).
Databases: PostgreSQL, MySQL, MongoDB.
Architecture: Microfrontends, State Management, Component-Driven Architecture, RESTful APIs.
Cloud & DevOps: AWS S3, Docker, Git, GitHub, CI/CD.
AI-Assisted Development: Cursor, OpenAI Codex, ChatGPT
Tools: Bit.dev (Bit.cloud), Jira, Postman, Figma.
